NC TraCS $5K - $50K Translational Research Matched Pilot Grant Program
Request for Applications (RFA) - Next deadline March 26, 2019

The North Carolina Translational and Clinical Sciences Institute (NC TraCS) is the academic home of the NIH Clinical and Translational Science Award (CTSA) at UNC Chapel Hill (UNC-CH). Our mission is to accelerate clinical and translational research from health science to discovery to dissemination to patients and communities.

NC TraCS is particularly interested in applications focused on opioid misuse and addiction, which is one of the state’s most significant health problems.

July 2018 Update: Research involving the enrollment of human subjects should discuss in their application how stakeholders will be engaged in the design and conduct of the research. Investigators who would like assistance with this aspect of their project can request a consult from TraCS Community and Stakeholder Engagement by clicking the “Request a Consult” button.

I. Purpose

The NC TraCS Translational Research Matched Pilot Program facilitates the transfer of research findings to clinical practice in order to improve the health of the people of North Carolina, and is designed to encourage and facilitate novel clinical and translational research in its many forms. Applications are encouraged from teams of investigators from different disciplines, institutions and diverse communities.

Translational research includes two areas of translation. One is the process of applying discoveries generated during research in the laboratory, and in preclinical studies, to the development of trials and studies in humans. The second area of translation concerns research aimed at enhancing the adoption of best practices in the community.

NC TraCS is interested in the following types of translational research projects:

- Research that generates initial or basic discoveries relevant to human health or disease regardless of whether the context of the discovery is the laboratory or the field.
- Research that applies or accelerates discovery into testing in clinical or population settings.
- Development and/or evaluation of the evidence base that changes practice.
- Research that investigates how practice improves health policy, health outcomes, and the health of populations.

Investigators may also apply for research funding to develop new technologies with commercial potential through the NC TraCS 4D pilot grant program. In addition, faculty seeking funding for activities within an early stage company they have founded can request a consult with KickStart Venture Services by contacting Tim Martin.

NC TraCS pilot grant awards are not meant as bridge funds or as supplementary funding for existing grants. NC TraCS cannot fund pilot grants where the research is conducted outside the United States. More information is available in the Pilot Program FAQ.

II. NC TraCS Partner Institutions and Contact Information

With the 2018 CTSA grant renewal, North Carolina State University (NC State) joined NC TraCS partners RTI International and North Carolina A&T State University (NC A&T) as part of NC TraCS. We are particularly interested in pilot applications from teams of investigators that involve collaborations with faculty and scientists at our partner...
Applicants from partner institutions are strongly encouraged to contact their NC TraCS liaison to discuss their pilot applications:

- **NC A&T** – Contact Meriel Parker, NC A&T Director of Life Science Research, with questions about the NC A&T collaboration, including for assistance identifying potential collaborators.
- **RTI** – Contact Lisa Gehtland, CTSA Project Coordinator, with questions about the RTI collaboration and potential collaborators at RTI. Learn more about research expertise at RTI at [here](#). **Note** - RTI investigators are required to consult with an RTI financial analyst during the preparation of their application budget. Contact Lisa Gehtland or Jasleen Atwal for details.
- **NC State** - Contact Jonathan Horowitz, Assistant Vice Chancellor, Research Infrastructure, Office of Research, Innovation and Economic Development (ORIED), with questions about the NC State collaboration, including for assistance identifying potential collaborators.

### III. PI Eligibility

UNC-CH, NC A&T, RTI and NC State researchers whose appointments allow them to serve as PI on externally sponsored research projects are eligible to apply as PI. This generally means permanent faculty (not adjunct appointments) and includes those with non-faculty appointments like “research scientist” and investigators from research institutes and centers who are eligible to apply for investigator-initiated awards and R01-level funding. For questions regarding eligibility, contact Mary Beth Cassely.

Applicants from NC A&T, RTI or NC State **must include an eligible co-PI from at least one other NC TraCS partner institution.** The required co-PI does not have to be from UNC-CH; however, the inclusion of a UNC-CH co-I/co-PI is strongly encouraged. The budget for grant applications that do not include a UNC-CH co-PI must be comprised entirely of funds from the home institutions of the applicants.

Applications with multiple PIs ("co-PIs") must identify one PI as the main contact PI, with primary responsibility for the administrative aspects of the pilot award.

NC TraCS encourages applications from junior investigators. Senior faculty PIs (Associate Professor and above) may apply however they must demonstrate a departure from a previous research direction, and this new direction must be clearly evident in the application.

### IV. Pilot Funding and Match Requirement

The total project award comprises a 1:1 match between NC TraCS and the applicant’s home schools, departments, centers or partner institutions, for a total award budget of up to $50,000. If the application involves research at multiple institutions, the budget from each institution should be approximately equal, or else the budget justification should explain why this is unfeasible. Applications that do not involve a UNC-CH co-PI and/or work done on the UNC-CH campus must have a budget comprised of funds from the applicant’s home institutions. In general, research activities at each institution should be funded by that institution. Funds cannot be subcontracted from one institution to the other.

All funds must be expended within **one year** of the project start date. The match must be in real dollars and cannot be “in kind” contributions, funds previously committed to the research project being proposed, or existing grants or contracts that the applicant already has. Matching funds must be secured before the application is submitted. Depending on the composition of the research team and the nature of the collaboration, matching funds may be available from one of NC TraCS’ partner institutions. A list of potential matching funders can be found [here](#). Note that matching funds may also come from sources not on this list.

### V. Use of NC TraCS Services
NC TraCS offers members a variety of research services and expertise, and applicants are encouraged to utilize those services in pilot grant applications where appropriate. A full list of NC TraCS services can be found here. NC TraCS services that require the investigator to contribute to the cost of the service should be consulted prior to submission to ensure that the application budget includes accurate information. Applicants are not required to use NC TraCS services in their pilot projects. NC TraCS Research Navigators are available to offer general advice and assistance with applications prior to submission. Click here to schedule a consultation.

VI. Review Criteria

Applications should be presented in a clear and logical fashion, make a convincing case for the significance of the work, and describe the proposed methods in sufficient detail so that an adequate evaluation of the application can be made.

The following review criteria will be considered:
1) Significance of the work
2) Novelty/innovation of the research idea
3) Relevance of the proposed study to translational research
4) Existence of a genuine multidisciplinary team in place that is integral to the conduct of the research
5) Potential for the project to lead to future external funding or a commercialization opportunity
6) Soundness of the proposed methods
   6a) If enrolling human subjects, appropriateness of community/stakeholder engagement plan and recruitment plan
7) If a senior level PI, whether the application represents a new research direction
8) Feasibility of accomplishing the stated project goals within the 12-month project period
9) Utilization of services and resources of NC TraCS (if applicable)
10) Focus on one of the 10 NC health priorities identified by NC TraCS (cancer, cardiovascular disease/hypertension, chronic disease management, diabetes, healthcare access, mental health, nutrition, obesity, physical activity, and substance abuse). NC TraCS does not require that your application pertain to any of these areas, but it is encouraged.

VII. Application Procedure

NC TraCS very strongly recommends involving a biostatistician in the application development process. The online application form will ask for the name of the biostatistician who consulted on the application.

For investigators without access to a biostatistician, biostatistical support can be obtained through the NC TraCS Biostatistics Service by completing the “Request a Consult” form. For cancer-related research, please contact the Lineberger Comprehensive Cancer Center for biostatistical support (email LCCC_BIOS@med.unc.edu).

For any questions, email nctracs@unc.edu or call 919-966-6022 or 866-705-4931.

Applications must be submitted using the online system called Foundant. Application sections (except the Abstract) will be uploaded as individual PDF files. The application sections are:

1) Scientific Abstract: A summary of the application for use by NC TraCS (250 word maximum).
2) Research Plan: The Research Plan should include Specific Aims, Significance, Innovation, and Approach. For studies enrolling human subjects, include engagement and recruitment plans either in this section or in the Human Subjects section (number 7 below). Include where applicable clear evidence of how the application meets the review criteria. 1.5 line spacing, font Arial 11 pt., and 1-inch margins all around. (5 page limit, including tables and figures.)
3) **Cited References** (No page limit)

4) **Budget:** Use [PHS 398 Form Page 4](#) (see Section VIII “Budget Guidelines” below for more details). The total budget should not exceed $50,000.

5) **Budget Justification:** Include sufficient detail for reviewers to assess whether appropriate resources have been requested (see “Budget Guidelines” below). (No page limit)

6) **Timeline** covering the 12-month funding period.

7) **Human and/or Animal Subjects:** Although Institutional Review Board (IRB) and/or Institutional Animal Care & Use Committee (IACUC) approval is not required at time of submission, the application should briefly describe any human and/or animal subject issues. If human subjects will be involved in the research, provide a description of their involvement and characteristics, study procedures, materials used in the research, potential risks to subjects, the process for recruitment and informed consent, and protection against risks. Provide assurance that the project will be reviewed and approved by an IRB, use a single IRB if the project is multicenter, and comply with HIPAA. NC TraCS pilot awards with investigators from multiple institutions will receive assistance from NC TraCS Regulatory Service in navigating through IRB and IACUC approvals pathways including making use of reliance agreements where possible. If vertebrate animals will be used, provide a description of the proposed use of the animals in the work outlined and procedures for ensuring that discomfort, distress, pain and injury will be limited. Provide assurance that the project will be reviewed and approved by an IACUC. Note that no funds will be released without the requisite approvals in place. (No page limit)

8) **NIH Biosketches** for the key members of the research team.

9) **Letters of Collaboration** (if applicable): Applications with a single PI who is not from one of the NC TraCS partner institutions (UNC-CH, NC A&T, RTI or NC State) must include a Letter of Collaboration from their NC TraCS partner institution faculty co-investigator. In addition, Letters of Collaboration may be included if they clearly state a commitment of resources required for the project’s success, for example biobank samples being made available to the investigator. Generic or non-specific letters of support are not required or encouraged. (No page limit)

10) **Resubmission Summary** (if applicable): Resubmission applications should include a summary that details changes to the original application. Include the names of any NC TraCS advisors consulted for the resubmission. Applicants are limited to one resubmission per application. If an investigator substantially changes and improves an application following two unsuccessful NC TraCS pilot submissions, he/she should consult with an NC TraCS Research Navigator to determine whether the changes/improvements warrant submission as a new application. (3-page limit).

11) **NIH Summary Statement** (if applicable): Applications that reference an external grant review relevant to the research should include the complete grant Summary Statement.

---

**VIII. Budget Guidelines**

1) The pilot grant budget covers expenditures of up to $50,000 for a 12-month period. The budget period will begin when applicable IRB/IACUC documentation is provided to NC TraCS and the PI indicates everything is in place for the project to begin. If the PI is not ready to start within 4 months of notification of funding, NC TraCS reserves the right to withdraw the award. At the end of the 12-month project period, any unexpended funds will be retained by NC TraCS and/or returned to the matching entity.

2) For most projects, one budget for the total project should be submitted. If matching funds are provided by an entity outside UNC-CH, please include a separate budget listing funds to be expended at each entity. The budgets should be combined into one PDF for uploading. Note the total budget should not exceed $50,000.

3) Pilot grant funds may be budgeted for (1) research support personnel, (2) use of NC TraCS services, including where applicable, salary support for NC TraCS biostatisticians, biomedical informaticians or other experts, (3) travel necessary to perform the research, (4) equipment, research supplies and core lab costs, or (5) other purposes deemed necessary for the successful execution of the proposed project.

4) Pilot grant funds **may not be budgeted for** (1) salary support for the PI or faculty collaborators (except as noted above in #2), (2) office supplies or communication costs, (3) meals or travel, including to conferences, except as required to collect data, (4) UNC-CH IRB fees, (5) professional education or training, (6) computers or audiovisual equipment, (7) manuscript preparation and submission, or (8) indirect costs.
5) Funds may not be used for UNC-CH faculty salary support, but requests from academic partners for such support will be considered. Faculty at partner institutions should communicate with the NC TraCS liaison at their institution (see section II above) regarding local policies regarding research institutes (RTI) or teaching-intensive institutions.

6) Expenditures for services outside the PI’s home institution will only be allowed if the equivalent service is not available in-house, and such an expenditure will require thorough justification.

IX. Other Guidelines

1) Prior to receiving funds, research involving human subjects must have appropriate approvals from the UNC-CH IRB, and research involving animals must have the appropriate IACUC approval. Either an IRB approval letter or an IRB response to a “Determination Whether Research or Similar Activities Require IRB Approval” must be submitted to NC TraCS. Human subjects or animal research must be reviewed in accordance with the university’s general assurances and HIPAA. In addition, if the research involves human subjects, all personnel named on the budget page must have certification of training in the protection of human subjects prior to the start of the grant period.

2) The NC TraCS Institute is funded through a CTSA grant from NIH’s National Center for Advancing Translational Sciences (NCATS). NCATS requires that they review and approve all NC TraCS pilot grants involving human subjects research prior to funds being released. If your application is funded and involves human subjects research, NC TraCS will require additional documentation to send to NCATS. NCATS generally completes their review in less than 30 days.

3) NC TraCS staff will work closely with funded projects throughout the grant period to monitor progress and provide assistance where necessary. A 6-month interim progress report and a final progress report are required. NC TraCS expects the PI to report the outcomes achieved due to the pilot award over the lifetime of the work, e.g., subsequent external funding, publications, presentations and patents, and to acknowledge NC TraCS research support where appropriate.

4) If an awardee leaves their position, they should contact NC TraCS to initiate close-out procedures.

X. Submission Instructions

NC TraCS $5K-$50K pilot grant applications are accepted 3 times per year (see the NC TraCS website for due dates). Applications will be accepted only through the online system called Foundant. Applications are due by 5:00pm on the due date. After submitting the application, applicants will receive email confirmation that the application was received. Applicants will be notified by email within 12 weeks of the deadline whether their application has been selected for funding. Partner institutions may have internal submission approval processes that should be completed prior to the NC TraCS submission deadline. (See section II for contact information for partner institutions.)
